## KENMERKEN

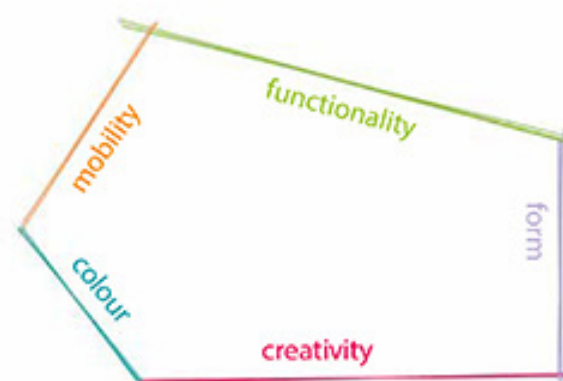

- Pentagon vorm (5 hoeken)
- Speels effect
- Akoestische zij- en achterwanden
- Licht van gewicht

## OPTIES

- Modulair samen te stellen
- Koppelbaar
- Media port met 2 stopcontacten mogelijk
- Leverbaar in diverse vormen
- Keuze uit verschillende kleuren en stoffen

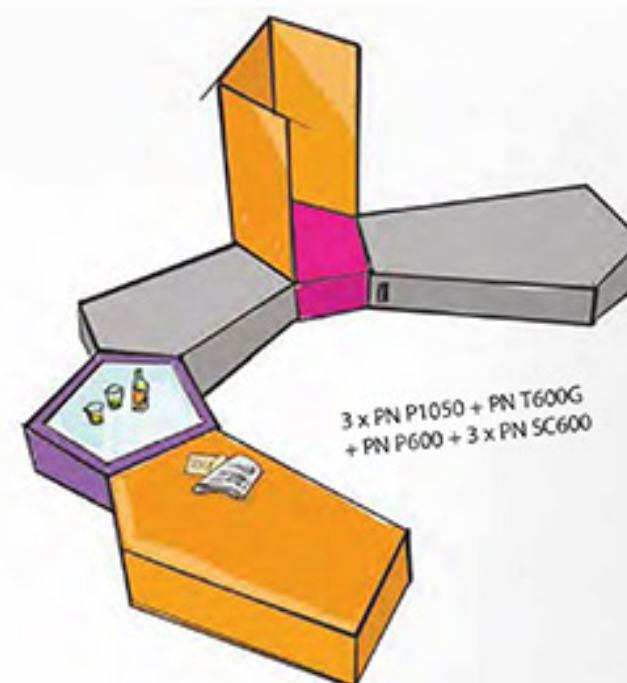

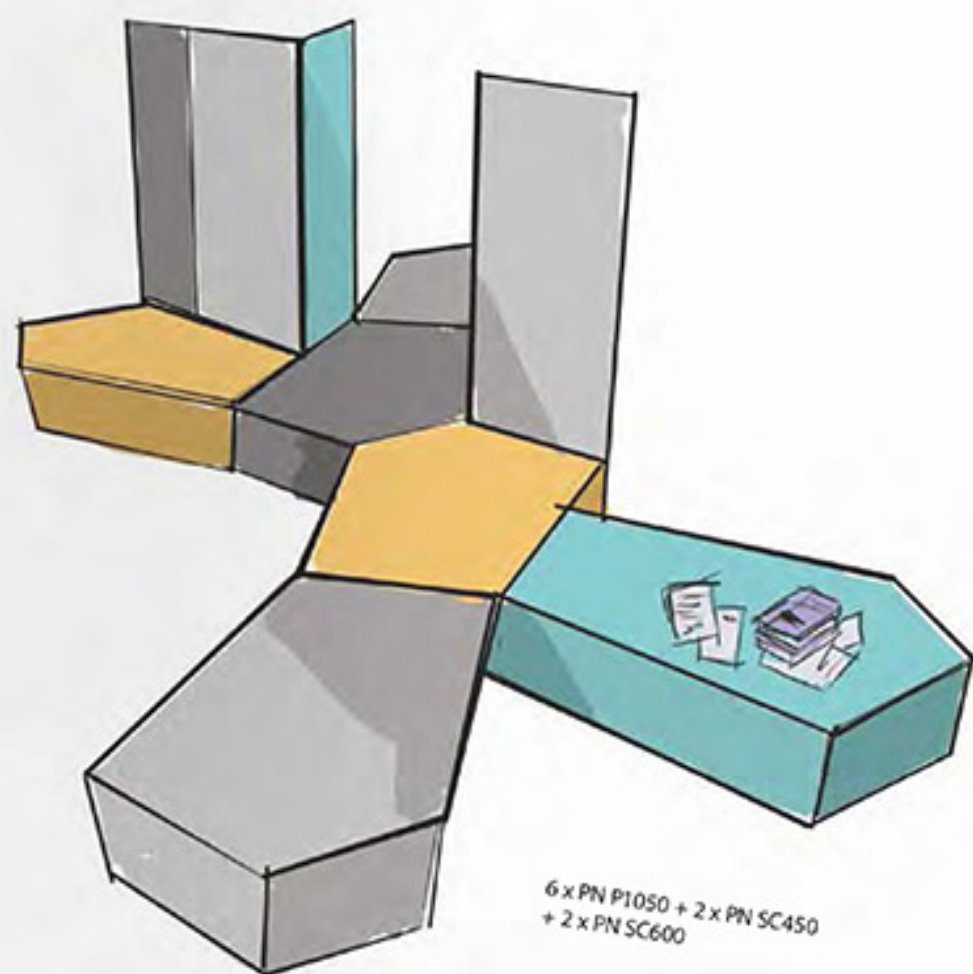

Penta is not just a pouf with a pentagonal seat. Penta is a system of modular seats with an infinite number of possible arrangements of sets and colours. This is a fully unhindered joy of creation, retained in its remarkable shape and robust, light structure.

free your  
imagination

create your space

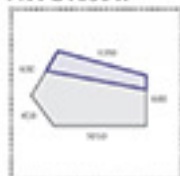

form

The name of the collection itself refers to the shape of a pentagon. This untypical shape was the basis for designing two compatible poufs with different sizes. By joining these modules with each other, we can create both nice, cozy sets and more developed open arrangements.

PN P1050

PN PO1050 R

PN PO1050 L

In model PN PO600 the back rest is mounted in accordance with the presented drawings.

PN PO600 R

PN PO600 L

In model PN PO600 the back rest is mounted in accordance with the presented drawings.

passive acoustic system

The walls of Penta are filled with acoustically passive foam and finished with New Blazer fabric or 3D-Harlequin mesh. The tests carried out in the Department of Mechanics and Vibroacoustics of the Academy of Mining and Metallurgy in Cracow have shown that the use of these materials results in a reduction in the level of incoming and outgoing sounds by a half.

PN P1050 + PN SC600 x 2 + PN SC450

Finishing of walls

3D-Harlequin available in 9 colours

New Blazer fabric available in 18 colours

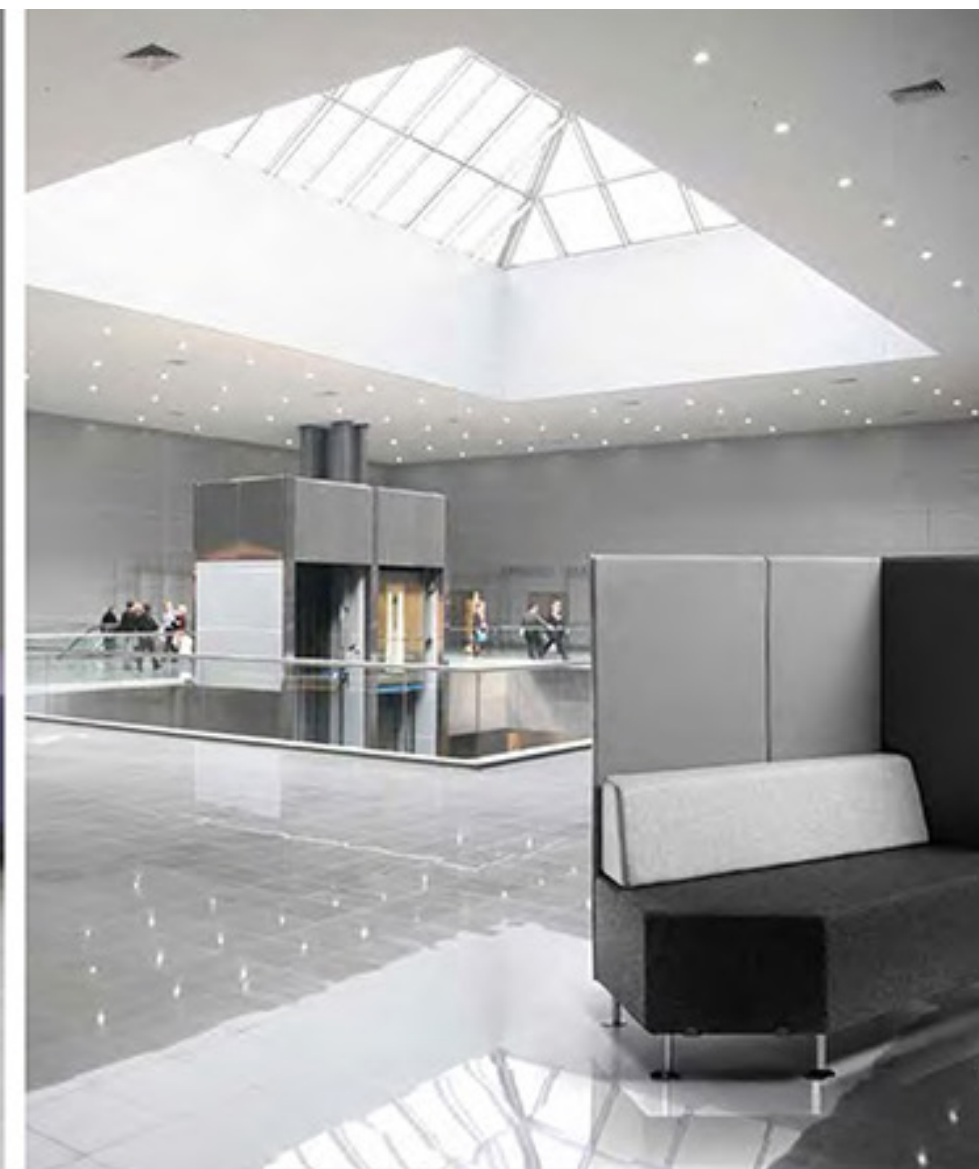

- SC walls are available in two widths (450 and 600 mm). They fit in all sides of the pouf. In the pouf PN P1050, the long wall consists of two elements: SC450 and SC600.
- The walls are mounted on the pouf with a knob.

## mobility

Thanks to its light and robust structure, Penta enables poufs to be arranged quickly and easily. No tools are required thanks to its simple system of mounting walls. All this enables very convenient and easy spatial arrangement depending on what we need at a given moment.

## functionality

Penta was designed taking its practical use into account. Thanks to the use of a simple system of acoustic walls and the possibility to install media ports, we can separate a fragment of autonomous space, which enables comfortable work in a small group, business negotiations or a private conversation. Such a solution proves its worth in open-plan offices, waiting rooms, cafes and other public spaces.

### USE

- shopping centers
- schools
- library
- waiting rooms
- rest zones

colour

Are you looking for a harmonious and quiet room? Or maybe an experimental combination of different colours on the seat and the sides? Only the designer's imagination is the limit, as Penta may be finished in a range of several dozen different fabrics and colours.

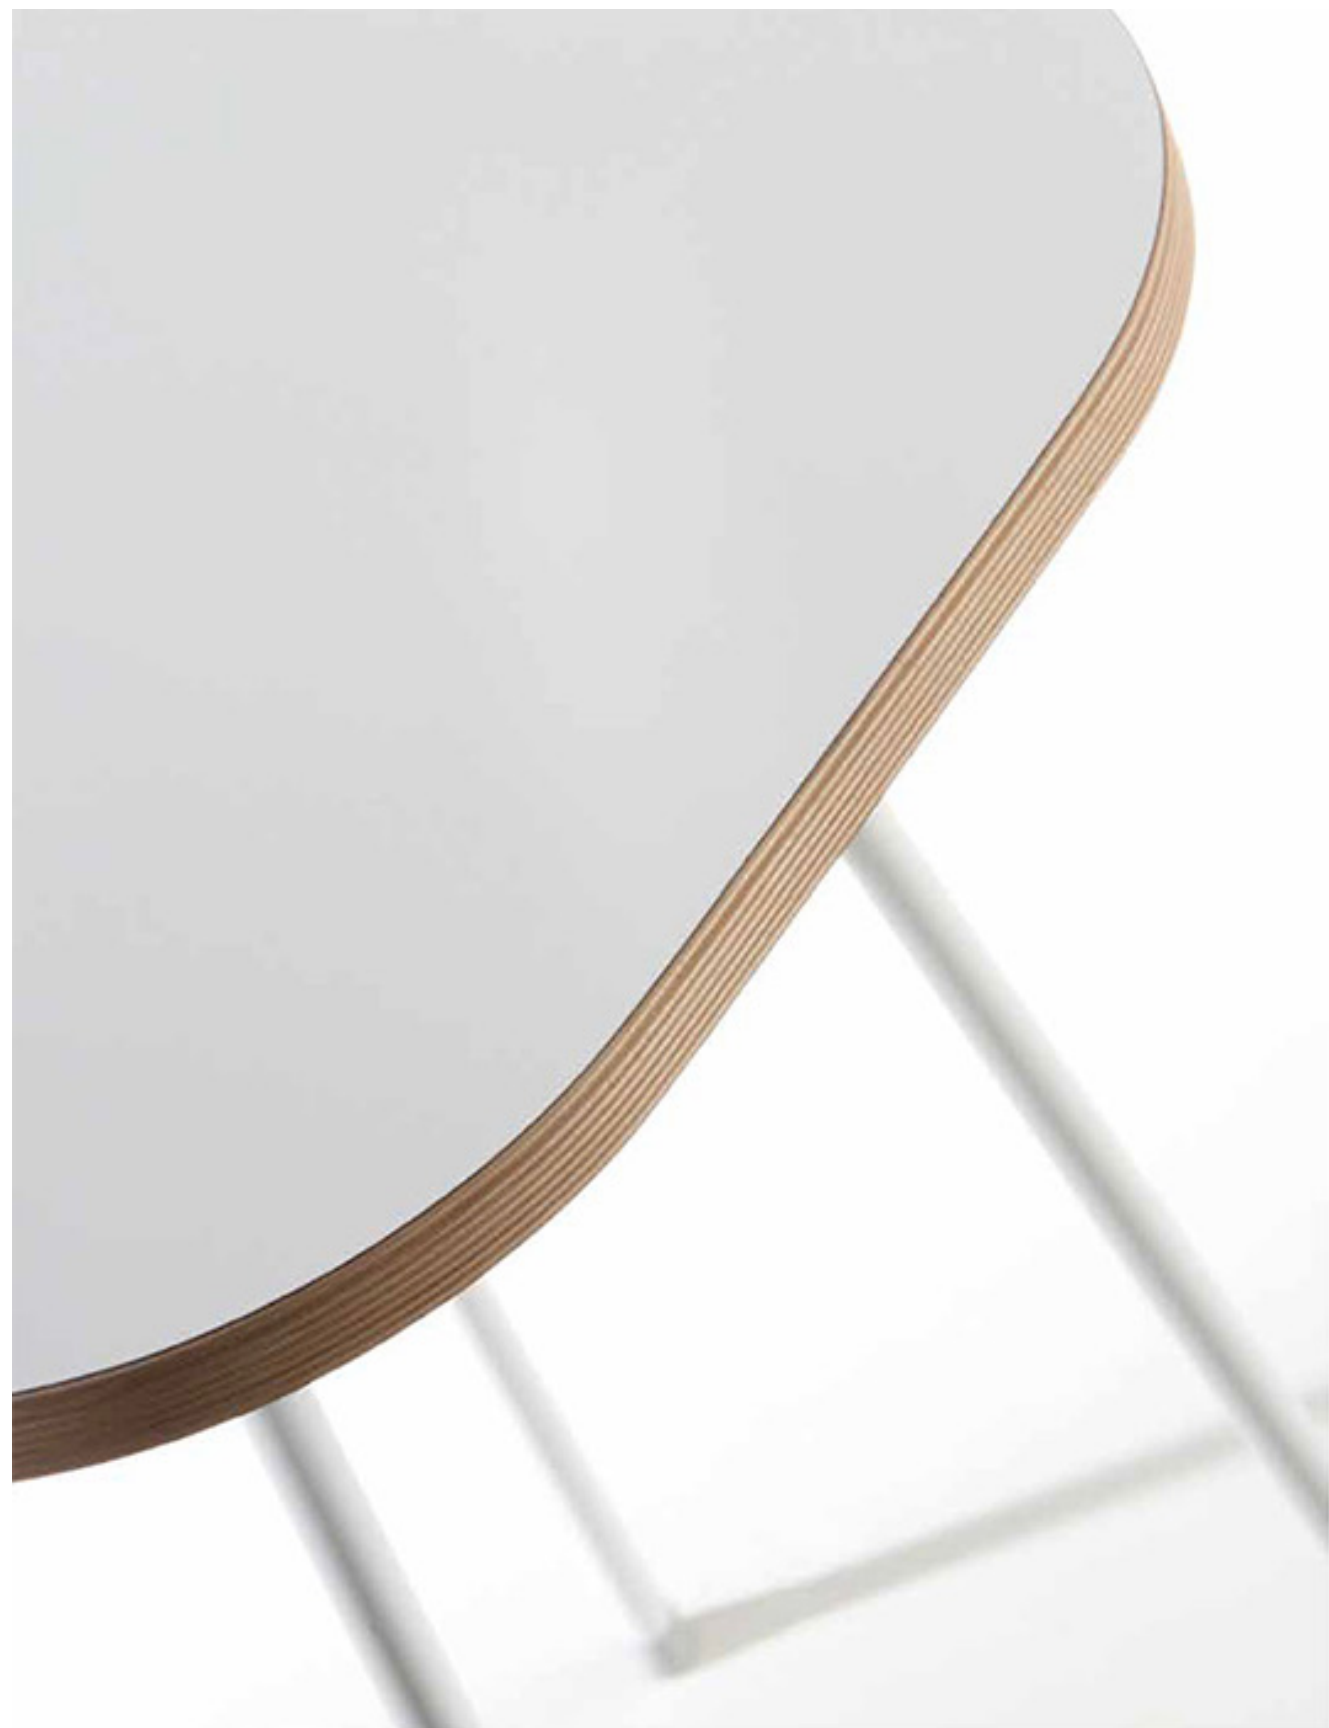

## creativity

Penta is inspiring. It is not limited by any conventions; it cannot be defined in a simple way. Penta gives the freedom of decision and it lives on the imagination of the designer. First of all, however, it gives us the freshness and joy of deciding, which we can make use of every day.

design: Beata Wilk

Uni tables are available in two versions of finishing: with a top made of plywood covered with CPL laminate or a natural cover, and a top made of melamine.

In the configuration of equipment different from the one seat, dimensions may vary slightly. The manufacturer reserves the right to introduce changes in the design and parameters of products offered without changing their overall nature.

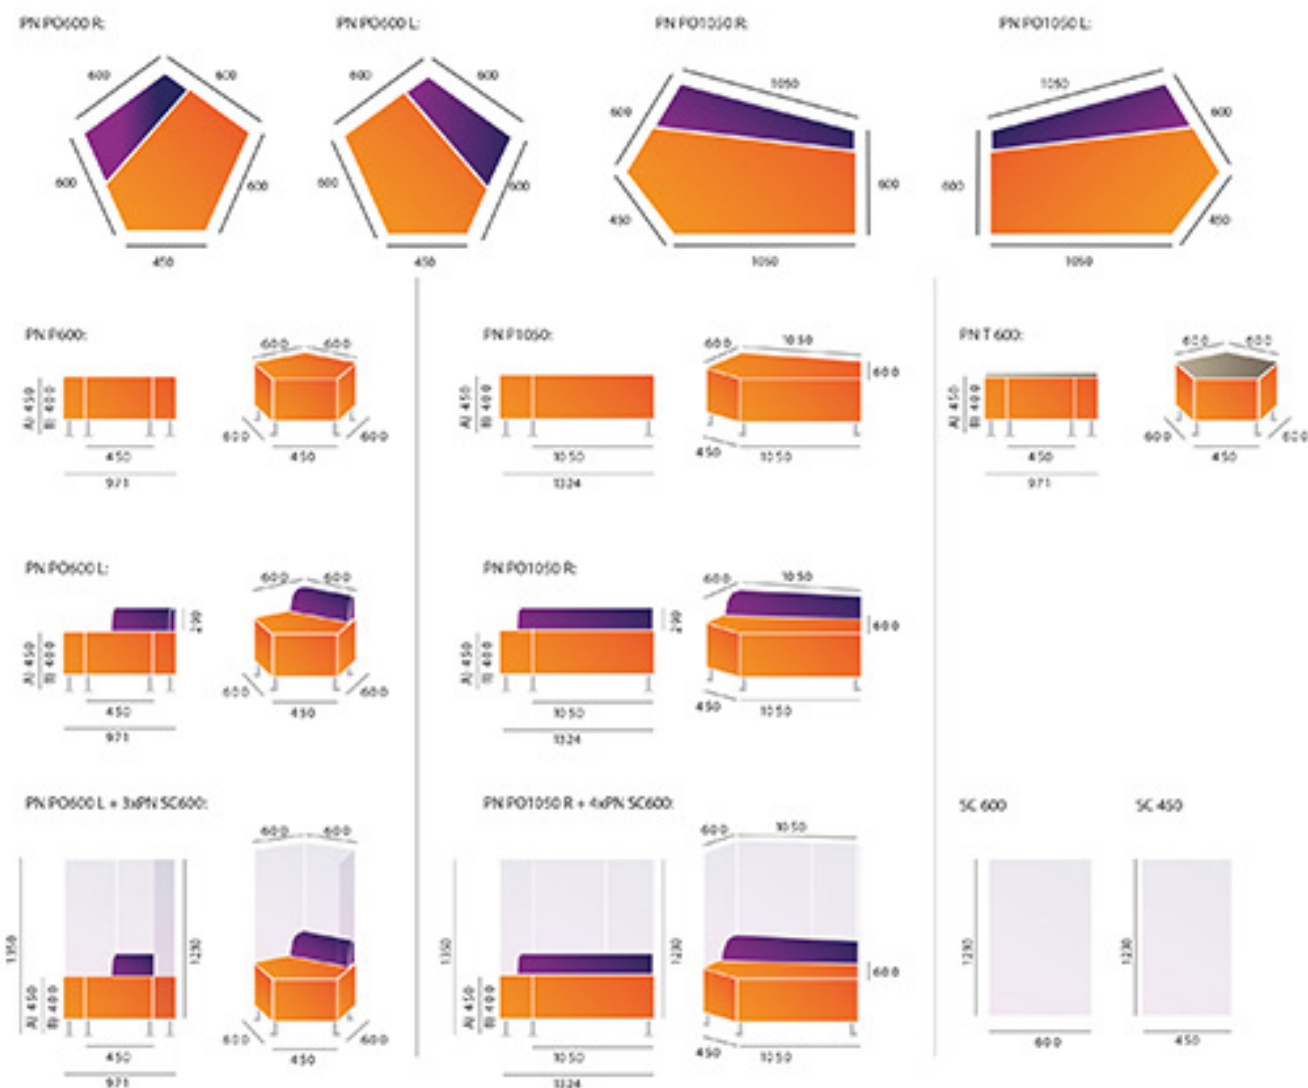

Note:  
If you order the module with the walls, reuse of this module without walls will require reupholstering, due to the holes that will be in the fabric.
