

taylord quilted

When modern design combined with fine tailoring finishing meets functionality and ergonomics arises Taylord, a timeless chair that dress up the environment with elegance and care.

taylord squared

Make complicated what is simple is trivial; transform what is complicated into something simple is incredibly simple: this is Taylord. The perfect tailoring finish in the squared version enhances the perfection of the intersections between the vertical and horizontal lines.

The perfect seams of our tailors, the first choice materials, the fully removable cover on Flat, Quilted, and Squared versions make every Taylord a unique piece of craftsmanship.

The armrest in polished brushed aluminum has been treated with double chrome treatment which makes it aesthetically perfect for life. It could be upholstered with covering matching with the shell cushion. The structure arises from the idea turned into patent to fix the tube with no visible screws.

taylord flat

In the common use "cuoio" and leather seem synonyms. In the English language there are not two words to express it, but only one: "leather". The difference is in the tanning process, in the material manufacturing. The leather "cuoio" (see Taylord Flat) is hard, resistant and thick. The leather (Taylord Quilted, Squared) is softer with mechanical differences compared to the "cuoio", but more elastic and soft. Both are noble materials, hygienic and transpirant.
